

Please note that being registered in a first or a second year of a master degree is not automatic, in particular if you are concerned by one of the following situations :

- *If you live abroad and have no French higher education diplomas at the time when you want to register at the University of Lille 1.*
  - *If you have already started to study in France (first or second years of master degree in 2015/2016) but you failed your exams and so consequently have no French higher Education diplomas.*
  - *If you have a French degree from Higher Education Institutions of the private or public sectors (even if these institutions can issue Bachelor and Master degrees with ECTS). Only degrees issued by French Public Universities are accepted.*
- So if you are concerned by one of these three cases, you have to pay attention to the procedure described below. There are two steps : admission and registration.
- Beginning of March 2016 - End of April or June 2016 (according to your personal situation), please fill in a file called "Validation of studies made outside France' .
  - If there is an admission file for the degree you want to apply for, you also need to do it at the same time.
  - Then in July, once you have been informed about the positive decision of the University, you will be able to register as a prospective student.

The aim of this procedure is to give the possibility to register at the University of Lille 1 even if you don't have the required French degrees.

If you click on this link, <http://webgestion4.univ-lille1.fr/demarche>, you will get information about administrative steps, procedures and calendar.

*Please note that if you haven't respected the procedure described above and the deadline of June 30<sup>th</sup> 2016, you will never be authorized to enroll at the University of Lille 1, even if the academic staff in charge of the degree you wanted to attend, sent you a positive decision for your admission.*
